# Ian Vasconcellos Caldas

*Curriculum vitae*
(last updated January 21, 2020)

Department of Computational Biology
Cornell University
101 Biotechnology Building
Ithaca, NY 14850
United States

## Education

| | |
|---|---|
| 2016–present | PhD candidate in Computational Biology at Cornell University.<br>Advisors: Dr. Andrew G. Clark and Dr. Philipp W. Messer. |
| 2013–2015 | M.Sc. in Genetics at Federal University of Rio de Janeiro.<br>Advisor: Dr. Carlos G. Schrago.<br>Thesis: Strategies to estimate with precision the divergence time of placental mammals using the morphological clock. |
| 2009–2013 | B.Sc. in Genetics at Federal University of Rio de Janeiro.<br>Advisor: Dr. Carlos G. Schrago.<br>Thesis: Performance of Bayesian skyline plots to estimate the demographic history of structured populations. |

## Publications

**Caldas, I. V.** & Schrago, C. G. (2019). Data partitioning and correction for ascertainment bias reduce the uncertainty of placental mammal divergence times inferred from the morphological clock. *Ecology and Evolution*, *9*(4), 2255–2262. doi:10.1002/ece3.4921

Duneau, D., Sun, H., Revah, J., San Miguel, K., Kunerth, H. D., **Caldas, I. V.**, … Buchon, N. (2018). Signatures of insecticide selection in the genome of *Drosophila melanogaster*. *G3: Genes, Genomes, Genetics*, *8*(11), 3469–3480. doi:10.1534/g3.118.200537

Wei, K. H.-C., Lower, S. E., **Caldas, I. V.**, Sless, T. J. S., Barbash, D. A., & Clark, A. G. (2018). Variable rates of simple satellite gains across the *Drosophila* phylogeny. *Molecular Biology and Evolution*, *35*(4), 925–941. doi:10.1093/molbev/msy005

Flynn, J. M., **Caldas, I. V.**, Cristescu, M. E., & Clark, A. G. (2017). Selection constrains high rates of tandem repetitive DNA mutation in *Daphnia pulex*. *Genetics*, *207*(2), 697–710. doi:10.1534/genetics.117.300146

## Selected conference presentations

2019 Evolution.
Poster: Inferring parameters of selective sweeps through supervised learning.

2018 Population, Evolutionary and Quantitative Genetics.
Poster: Inference of sweep parameters through supervised learning.

2017 Society for Molecular Biology and Evolution.
Poster: Tandem short repetitive DNA recapitulates the evolutionary history in *Drosophila*.

2015 Evolution.
Poster: Data partitioning improves the morphological clock of placental mammals.

## Awards

2016 Presidential Life Sciences Scholarship, Cornell University.

2013 Master's Research Scholarship, National Council for Scientific and Technological Development of Brazil (CNPq).

## Professional society memberships

2017–present Genetics Society of America (GSA).

2015–present Society for the Study of Evolution (SSE).

2015–present Society for Molecular Biology and Evolution (SMBE).

## Further training

*Scientific workshops*

2019 SLiM Workshop, Cornell University.

2018 Search for Selection, The National Institute for Mathematical and Biological Synthesis.

2017 High Performance Computing on Stampede 2, Cornell University.

2015 Applied Bayesian Modeling, Osvaldo Cruz Foundation.

2014 Paleobiological and Phylogenetic Approaches to Macroevolution, National Evolutionary Synthesis Center.

*Leadership training*

2019 Future Professors Institute: Advancing Diversity in the Academy, Cornell University.

2017 Intergroup Dialogue Project, Cornell University.

## Skills

*Technical skills*

Python and R programming, data analysis, data visualization, computational genomics, phylogenetic inference, machine learning, deep learning, LaTeX, Adobe Illustrator.

*Languages*

| | |
|---|---|
| Native | Portuguese |
| Fluent | English, German |
